

Micro-Art

Imaging Software Inc.

Micro-Art provides a comprehensive Digital Imaging software suite to make processing your images a Snap. The simple yet powerful modules use batch image processing to reduce and / or eliminate manual intervention and save up to 70% of your manual process and time requirements in producing digital or printed output formats.

All products are One Time cost with no annual fees and free updates.

COMPOSITE Picture this! With a folder of images and a text file containing individual names and image name and a few clicks of the mouse you can create a School or Company Composite in JPG format of up to 40x40 inches in a minute or two. No more cut and paste! No more sorting manually! No more resizing! No time wasted! **Composite** automatically sizes the images to fit on the defined output format and sorts the images by individual last name, first name and / or specific position on the composite if required.

Built-in **COMPOSITE+** Creates an individual Composite for each person that is on the Composite with the individual highlighted in the top left, right corner or centered.

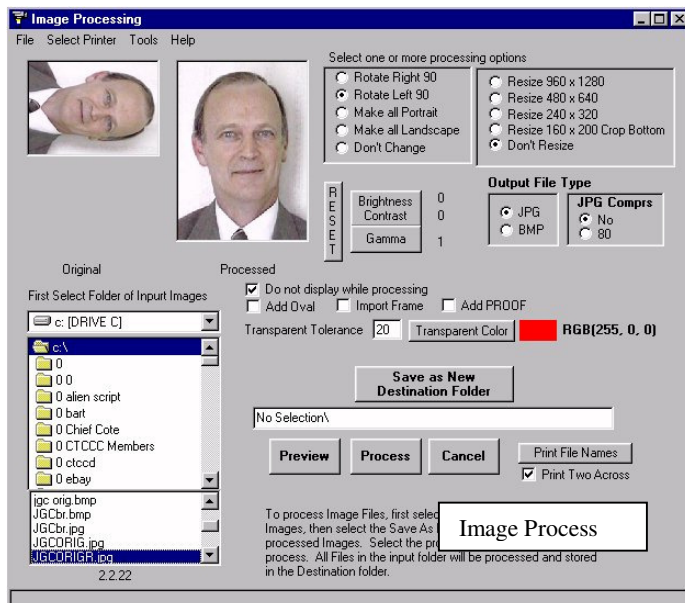

Image Process Prepares all your images in batch mode, using a few clicks of the mouse. All The images in the selected folder can be rotated, resampled (resized), color enhanced, adjusted for brightness, contrast and gamma, made into ovals. Just set up the parameters and click to complete the processing. Add your own frames and / or text to all your images with overlays created in Photoshop or other imaging software.

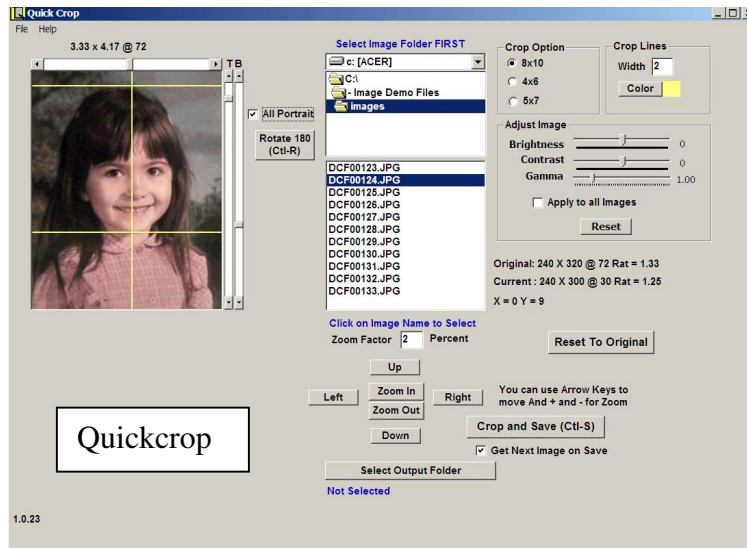

Batch Create ID cards using ID2, or IDLAM for high volume pvc Cards. Output can be JPG Image, PVC or standard printer.

Plaque (Memory Mate) simplifies the creation of 8 x 10 (or any size) Sports or promotion plaques using a Group photo, a folder of individual photos and a plaque mask of your own design as background. That simple! Click and produce one memory mate for each individual in the folder!

Quick Crop is the easiest and quickest “what you see is what you” get Cropping tool

ON-Site Processing

Event provides ONE SCREEN shopping basket and order processing functions for Event photography. Any number of viewing stations can be attached to a Lan for instant access. **Hotproof** provides instant Order form production

with Image due date and barcode.
